Staničení (m)

Technical drawing of a square floor slab with dimensions and reinforcement details. The overall width is 3490 mm. The distance between the centerlines of the main reinforcement bars is 1200 mm. The distance from the centerline of the main reinforcement bars to the centerline of the secondary reinforcement bars is 1500 mm. The drawing shows the reinforcement layout, including the main reinforcement bars (PLOVOCI TRN 60 KM) and the secondary reinforcement bars (TR102/11, U180, TR377/20). The slab is supported by four columns.
